

KANJANAROJ KHAMKHOM

+66 98 794 5813 · kanjanaroj.k@gmail.com · <https://portfolio-jamesbond.vercel.app>

Full-stack developer with end-to-end ownership across web, mobile, and backend systems — from database schema design to production-ready REST APIs and responsive UIs. Built 6 complete applications across 3 years, with additional depth in AI pipelines and IoT integration. Seeking a collaborative engineering team where systems thinking and shipping instincts matter.

PROFESSIONAL EXPERIENCE

Jig Inventory Management System

2025

Full-Stack Web Application · Co-operative Education

Eliminated 100% of Excel-based part tracking and reduced manual search time by 70% by developing a QR-based digital inventory system. Prior to development, streamlined cross-functional workflows across Engineering, Planning, and Production to address operational root causes. Engineered with a rigorously modular 3-level design (Blazor WebAssembly, ASP.NET Core, REST API, SQL Server), featuring JWT, RBAC, automated Excel pipelines, and a real-time dashboard.

Blazor WebAssembly, ASP.NET Core, C#, SQL Server Entity Framework, JWT Auth, Tailwind CSS, REST API, Docker

Financial Knowledge Graph + AI Q&A System

2024

Data Engineering / AI · Personal Project

Built a fully offline AI-powered Q&A platform for real-time financial data by designing a Kafka to MongoDB streaming pipeline and a FastAPI backend that generates context-aware prompts for a locally-hosted LLM (Ollama/llama3). Enabled natural language querying of live stock data with no external API dependency, preserving full data privacy.

Python, Apache Kafka, MongoDB, FastAPI, Ollama / LLM, Docker, RAG

Meeting Room Booking Application

2024

Mobile Application Development

Accelerated room reservation workflows for 3 distinct user roles (User / Admin / Approver) by leading end-to-end development of a cross-platform mobile app — from Figma UI design through Flutter implementation and SQL database management.

Flutter, Dart, Figma, SQL, RBAC. Mobile Dev

Car Booking System

2024

Database Systems

Reduced data inconsistency risk by designing a fully normalized relational database (cars, users, bookings) and building a dynamic PHP + MySQL web interface with complete CRUD operations and enforced data integrity constraints.

PHP, MySQL, Database Design

EDUCATION

B.Eng. Computer Engineering

Mae Fah Luang University

Expected 2025

CERTIFICATE

Cloud Basics : Development and Basic Operations

Huawei Technologies Co.

Information Representation and Data Organization

Huawei Technologies Co.

HCIA-Big Data

Huawei Technologies Co.

Cybersecurity Essentials

Cisco Systems, Inc.

SKILL

FRONTEND

HTML, CSS, JavaScript, React, Flutter, Blazor, Figma, Tailwind CSS

BACKEND

Node.js, ASP.NET Core, Fast API, PHP, REST API, JWT Auth

AI / DATA

Python, Apache Kafka, Ollama, Faster R-CNN, LLM

DATABASE

MySQL, SQL Server, MongoDB, Entity Framework, Database Design

DEVOPS & TOOLS

Docker, Git / GitHub, Linux, CI/CD (GitHub Actions)
